

Project Engineer M/F

Permanent contract, position based in Kallo, Belgium

Cryo Logistics Belgium is the first cryogenic & packaged gas platform in the world. Offering technical support and services to Gas and Logistics companies. To support its growth, Cryo Logistics is looking for a project engineer.

Main tasks:

- Continuous improvement projects on Kallo site
- Technical support for high pressure gas for the Group
- Manage compliance, quality standards and specifications
- Replacement of the two engineers during their travel and holidays

Some travels will be required in Europe and internationally.

Profile:

- You have an engineering background or equivalent (5 years of higher education) and at least 1 or 2 years of experience.
- You are rigorous, methodical, creative and have the practical sense to design while taking into account the constraints. Your interpersonal skills allow you to interact both internally and externally.
- English at a professional level is mandatory.
- Salary: from 35.000€ a year and upon experience
